Senior Front End Developer

Company: Source Of Asia

Working Location: Hanoi

Salary: 1,300 - 1,900 $

Levels: Senior (5-10 YOE)

Roles and Skills: Developer Frontend AJAX TypeScript HTML JavaScript API ReactJS SEO FrontEnd Git AngularJS

Job Overview And Responsibility

We are looking for a Senior Front-End Web/Mobile Developer who is experienced in combining the art of design with the art of programming. You will work to bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

RESPONSIBILITIES
▪ Reviewing requirements from clients and creating UI/UX designs that meet their needs while ensuring technical feasibility
▪ Translate designs and wireframes into high quality code
▪ Design, build, and maintain high performance, reusable, and reliable application, including building reusable code and libraries for future use
▪ Optimize application for quality, responsiveness, maximum speed and scalability
▪ Collaborate with a team to define, design, and ship new features.
▪ Communicating with other team members regarding goals and progress of projects
▪ Identify and correct bottlenecks and fix bugs.
▪ Writing code using a variety of programming languages including HTML, CSS, JavaScript, PHP, React, Flutter, etc.
▪ Help maintain code quality, organization, and automatization.
▪ Mentoring Junior Front End Developers

Required Skills and Experience

▪ Language: Vietnamese (Fluent or Native) AND: Limited Working Proficiency in English communication (TOEIC 605+ or IELTS 4+)

▪ Qualifications:
- Language Mastery: HTML, CSS, and JavaScript/TypeScript
- Minimum 4 years of experience as a Front End Developer
- Minimum 4 years of relevant experience in web/mobile/software development environment
- Excellent communication, motivational, and collaboration skills.
- Experience developing admin dashboards using different frameworks
- Experience with ReactJS/AngularJS/Angular 2
- Experience with Google API services / Firebase
- Familiar with compiling/bundling process: Gulp/ Webpack etc
- Good understanding of asynchronous request handling, partial page updates, and AJAX
- Proficient understanding of cross-browser compatibility issues and ways to work around them.
- Proficient understanding of code versioning tools, such as Git
- Good understanding of SEO principles and ensuring that the application will adhere to them.

Why Candidate should apply this position

We can offer exciting development opportunities through expanded lateral roles, stretch assignments, or people leadership. Some of our opportunities include:

- Growth:
- We can help you with the tools to grow your skills, salary, and self.
